PROFESSIONAL EXPERIENCE

Software Engineer - GoldenTik (formerly CartBuzz), Amman, Jordan Jan 2026 - Present

- Contribute to full-stack delivery of a private multi-vendor e-commerce platform using Next.js, NestJS, TypeScript, SCSS, Docker, and project-required integrations.
- Build and review maintainable interface, API, and data-layer changes while protecting confidential product and business information.
- Use Codex, Claude, Cursor, and GLM for scoped exploration and implementation; review diffs and validate behavior before integration.

Full-Stack Developer (Contract) - Vero IT, Remote May 2025 - Dec 2025

- Built responsive client web applications using React, Next.js, Node.js, Express.js, TypeScript, PostgreSQL, and MongoDB.
- Built REST APIs, authentication flows, and responsive product interfaces independently and within a delivery team.

Freelance CAD Designer - Independent Jul 2022 - Oct 2023

- Produced precise mosaic and architectural patterns and coordinated technical specifications with artisans and production teams.

SELECTED PROJECTS

EV Solution JO | React, Node.js, MongoDB, PostgreSQL

- Built a full-stack operations platform for DC/AC EV charging with live station and session monitoring, reporting, and analytics.

Booster Icon System | TypeScript, Node.js, Next.js, SVG, SVGO

- Engineered a framework-agnostic package pipeline for 25,396 SVG files with naming, security, parity, and runtime validation gates.

Figma Design Intelligence Plugin | TypeScript, Figma Plugin API

- Built a plugin that extracts design-system structure, prototype graphs, Smart Animate relationships, and interaction metadata.
